

Good Morning,

We received the refusal decision for the above application on 29th April and wish to appeal this decision.

I wish to bring to your attention a number of photos taken during a short drive around the area - most of which taken on main through-fare roads rather than a dead-end street like ours - which show cases of fences along the property line as well as at the front of the property - I have not enclosed address of these properties but I can assure you all were taken within a few roads of my Property and all were within the Garden City Management Scheme area map as per your website.

Obviously I appreciate without specific addresses you can't comment on individual cases, however I wish to know if you have granted permission to ANY properties within the Management Scheme to have a fence at the side/front of their property? As I can't believe that all of the above properties in very well know WGC roads don't have permission - and if they have why we are being discriminated against?

These pictures were taken within a 10 minute drive around the local area (Hanside, Parkway, Howlands etc.) - I'm sure with more time I could find many, many more.

Many Thanks
