6 Risk Management

- 6.1 A risk assessment has been prepared in relation to the effectiveness of controls on budget monitoring. The concern is that the desired policy objectives, as set out in the Asset Plan and Capital Strategy, have not been met within time scale. As a result of the additional balances on the fund, that are available for investment, there is reduced risk of loss of investment income. It is recommended that in order to reduce the risk of further under spends, that additional emphasis is placed on high risk budget areas in future capital monitoring reports leading to stronger action planning.
