

Summary of Changes in the Health and Safety Service Plan 2017/18

The information contained with the Health and Safety Plan such as the aims and objectives and information relating to the delivery of the service are the same as the detailed in the plan of 2016/17.

The Information relating to the Enforcement Intervention and Overview of 2016/17 (page 10 of the plan) have been changed to reflect the year in question.

The main changes in this document can be found in appendix B of this document which details our Local Intervention plan for 2017/18. The plan consists of both Pro Active and Reactive Interventions.

Pro Active interventions include national priorities such as falls from heights and crowd management. We are also aiming to work with small and medium sized enterprises especially those who handle cash such as betting shops and other retail premises.

Some of the reactive priorities for 2017/18 will be:

- Supporting Community events, which are identified through the Safety Advisory Team
- Investigation of Complaints and
- Investigation of accidents which meet the selection criteria as detailed in the national guidance.
